Talks

- March 2011 **Android Application Development**, *JSCOE*, Speaker.
Presented this seminar as part of curriculum with Live Demo using Android SDK, eclipse

Projects

GitHub **Personal Profile:** <https://github.com/vinaysawant>.

Curriculum

• Automatic Monitoring and Speed Violation Ticket System| SpeedTicket

An automatic speed violation control system is designed to warn the driver and using wireless communication for transmitting the speed and the unique information of the vehicle to the police station when a speed violation ticket to be issued. The system notifies a driver of certain control details in real time and prevents vehicle violation in advance via warning messages when the vehicle exceeds a safe speed zone, thus eliminating the manpower needed to use radars to check the speed of the cars or examine photographs of speeding vehicles taken by fixed cameras.

Tools used: Python, Java, C, MySQL

- **Android app for sending SMS| SendSMS**

Used android SDK and eclipse.

- **Placement Management Website**

Designed Placement Management System for college.Used PHP,MySQL,HTML,CSS, Apache2 (LAMP Server).
